

War is not Green!

- The U.S. military is the single largest consumer of oil in the world and the world's larger polluter, generating 750,000 tons of toxic waste annually.

<http://www.safetyforum.com/mtw/>

- The U.S. military maintains 737 bases worldwide, contaminating local communities and causing increased rates of cancer, kidney disease, birth defects and miscarriages.

<http://www.alternet.org/story/47998>

<http://www.alternet.org/environment/39723>

- Nowhere is this more evident than in Iraq, where oil spills have devastated bird and marine life, bombs have destroyed water and sewage plants, and the use of massive amounts of toxic depleted uranium has led to skyrocketing rates of cancer and birth defects.

<http://www.guardian.co.uk/world/2009/nov/13/falluja-cancer-children-birth-defects>

- In the U.S. the ground water on Cape Cod, which is the only source of drinking water in the area, has been contaminated by military fuel spills and hazardous munitions waste that have leached into the soil and groundwater from the Otis Air Force Base and Camp Edwards.

<http://www.epa.gov/region1/mmr/>

- 130 military Bases in 39 States have been designated superfund clean-up sites by the Environmental Protection Agency.
